

# Reed Forestry Ltd

# Reed Forestry Ltd

- We are committed to providing you with the following services and forestry goals:
  - Sustainable forestry
  - Clean efficient growth of land and forest
  - Removal of unproductive and suppressed product
  - Maximizing the value of the worst wood
  - Leaving behind a better forest for tomorrow

# Sustainable Forestry

- Sustainable forestry
  - A forest for tomorrow
  - Attractive job
  - Promotes growth of desired product
  - More expensive
  - It costs money to cut small wood
  - We leave a **BETTER** product for you

# Sustainable Forestry

- Non-sustainable forestry
  - “Take the best leave the rest”
  - Maximizes your dollar
  - Quick solution
  - Worst wood remains and only gets bigger

# Clean efficient growth of land and forest

- The difference between a block done with the proper job description and a block left untreated.

# Clean efficient growth of land and forest

- This is an example of what a landowner can expect when their block is freshly cut, and what to expect 5 years later.

# Clean efficient growth of land and forest

- 10 years later

# Clean efficient growth of land and forest

- 20 years later the difference between the two becomes quite shocking.

# Maximizing the value of the worst wood

- One way to get the top dollar for poor wood is through chipping.
- It removes the waste today and leaves an opportunity for a new forest to regenerate while giving you, the customer, a good price for your product.

# Leaving behind a better forest for tomorrow

- Plan for the future; Planting and Silviculture options
- Why leave behind trash for future generations?
